

REMARKS

The Office has required Applicants to elect one of fourteen perceived inventive concepts to which the claims must be restricted.

Applicants hereby elect, with traverse, **Group 4**, namely claim 1 (in part) drawn to Bicyclic Pyrimidines fused to an N-containing ring (Formulae II-V, VII-IX, XI, XIII-XIV, where $X=N$ and where, in III and XIII, $W=N$, and Formulae X and XII, where $X=C$) where the six membered ring contains two nitrogens and is fused to the N-containing ring, classified in class 544, various subclasses. Applicants respectfully traverse the restriction requirement insofar as a search for publications relating to any one of Groups I-XIV would reveal publications relating to any of the other Groups and, thus, would not impose a serious burden on the Examiner. Accordingly, Applicants respectfully request that the restriction requirement be reconsidered and withdrawn.

Applicants reserve the right to pursue any non-elected Groups in one or more related applications if the restriction requirement is maintained. Applicants respectfully request that the application now proceed promptly to examination.

Very truly yours,

Daniel A. Wilson
